

# Hasan Al Mahmud Sakib

## Junior Full Stack Developer

+880 1842-001223 · hamsakib03@gmail.com · Bashundhara R/A, Dhaka, Bangladesh · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

### CAREER OBJECTIVE

Passionate Junior Full Stack Developer pursuing a BSc in CSE at North South University. I build end-to-end web applications, automation systems, and AI-powered tools — delivering senior-level output by leveraging cutting-edge AI to ship faster without sacrificing quality.

### TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), Python, HTML5, CSS3

**Frontend:** React.js, Vite, Tailwind CSS, Framer Motion, React Router DOM

**Backend:** Node.js, Express.js, MongoDB, Mongoose

**Auth & APIs:** Firebase Auth (Email/Password, Google OAuth), REST APIs

**Tools & DevOps:** Git, GitHub, Vercel, Render, Railway, VS Code, Cursor, npm

**AI Stack:** Claude API, OpenAI / GPT-4o, GitHub Copilot, LangChain, n8n, Playwright, Prompt Engineering

### PROJECTS

**ReelScout** | *Instagram Influencer Analytics Platform* | [Live](#) · [GitHub](#)

Production-grade web app that intercepts Instagram's private XHR endpoints via Playwright to extract real view counts and engagement metrics invisible to conventional scraping.

- XHR interception for real view/play count data — bypasses DOM scraping limitations
- 1-hour in-memory cache with force-refresh UI; influencer scoring algorithm
- Hidden likes/views detection; anti-FOUC dark/light theme; deployed live on Railway

*Node.js · Express · Python · Playwright · Railway · Vanilla JS · CSS3*

**InstaAutomator** | *AI-Powered Instagram Growth Engine* | [GitHub](#)

Intelligent Instagram automation engine managing account growth through programmatic engagement and persistent browser sessions without triggering bot detection.

- Persistent session management (cookie + localStorage serialization)
- Human-like timing randomization; configurable automation rules via JSON config

*Python · Playwright · JSON · Browser Automation*

**KeenKeeper** | *Smart Goal & Habit Tracking App* | [GitHub](#)

React productivity app for tracking goals and habits. Surfaces momentum with streak counters and progress rings — fully offline, zero server dependency.

- Timezone-aware streak preservation; visual progress rings and completion grids
- Category-based organization; mobile-first responsive design; localStorage persistence

*React 19 · Vite · JavaScript · CSS3 · LocalStorage*

**Pluto MMC** | *Media & Marketing Company Website* | [GitHub](#)

Conversion-optimized agency website with cinematic animations, scroll-triggered reveals, and sub-100ms load times.

- Framer Motion scroll-triggered reveals; service showcase with interactive cards
- Lighthouse performance score above 90 with Vite bundling

*React 19 · Vite · Framer Motion · JavaScript · CSS3*

### EDUCATION

**BSc in Computer Science & Engineering** — North South University, Dhaka | 4th Year | 2021 – Present (Bangladesh's #1 Private University)

### EXTRA-CURRICULAR ACTIVITIES

- Active volunteer and team contributor in collaborative university and community projects
- Participated in group coding and problem-solving initiatives as part of peer learning programs

### LANGUAGES

Bengali — Native Proficiency | English — Professional Proficiency (IELTS 7.5 Overall)
