

Hasan Al Mahmud Sakib

Junior Full Stack Developer

+880 1842-001223 · hamsakib03@gmail.com · Bashundhara R/A, Dhaka, Bangladesh · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

CAREER OBJECTIVE

A passionate and detail-oriented Junior Full Stack Developer currently pursuing a BSc in Computer Science & Engineering at North South University. I build end-to-end web applications, automation systems, and AI-powered tools — delivering senior-level output by leveraging cutting-edge AI to ship faster without sacrificing quality. My goal is to grow into a well-rounded engineer who delivers impactful digital products while continuously sharpening skills across the full development stack.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Python, HTML5, CSS3
Frontend	React.js, Vite, Tailwind CSS, Framer Motion, React Router DOM, Animate.css
Backend	Node.js, Express.js
Database	MongoDB, Mongoose
Auth & APIs	Firebase Authentication (Email/Password, Google OAuth), REST APIs
Tools & DevOps	Git, GitHub, Vercel, Render, Railway, VS Code, Cursor, npm
AI Stack	Claude API, OpenAI API / GPT-4o, GitHub Copilot, Prompt Engineering, LangChain, n8n, Playwright, AI Automation Workflows
Interpersonal	Teamwork, Time Management, Problem Solving, Adaptability, Communication

PROJECTS

ReelScout | *Instagram Influencer Analytics Platform* [Live Site](#) · [GitHub](#)

A production-grade web app that deep-analyzes Instagram influencer performance using Playwright to intercept private XHR endpoints in real-time — extracting view counts and engagement data invisible to conventional scraping.

- XHR interception for real view/play count data — bypasses DOM scraping limitations
- 1-hour in-memory cache with force-refresh UI and influencer scoring algorithm
- Hidden likes/views detection & exclusion; anti-FOUC dark/light theme
- Deployed & live on Railway

Tech: Node.js · Express · Python · Playwright · Railway · Vanilla JS · CSS3

InstaAutomator | *AI-Powered Instagram Growth Engine* [GitHub](#)

An intelligent Instagram automation engine that manages account growth through programmatic engagement and session persistence without triggering bot detection.

- Persistent session management (cookie + localStorage serialization)
- Human-like timing randomization and configurable automation rules via JSON config
- Anti-detection: randomized delays, viewport simulation, XHR response monitoring

Tech: Python · Playwright · JSON · Browser Automation · Session Management

KeenKeeper | *Smart Goal & Habit Tracking App* [GitHub](#)

A React productivity app for tracking goals and building daily habits. Surfaces momentum visually with streak counters and progress rings — fully offline, zero server dependency.

- Timezone-aware streak preservation logic; visual progress rings and completion grids
- Category-based organization (health, learning, work); mobile-first responsive design
- Fully offline — all data persisted locally via structured localStorage layer

Tech: React 19 · Vite · JavaScript · CSS3 · LocalStorage

Pluto MMC | *Media & Marketing Company Website* [GitHub](#)

A conversion-optimized website for a media and marketing agency featuring cinematic animations, scroll-triggered reveals, and sub-100ms page loads.

- Cinematic animated hero; scroll-triggered section reveals via Framer Motion
- Service showcase with interactive cards; portfolio gallery with lightbox
- Lighthouse performance score above 90 with Vite bundling

Tech: React 19 · Vite · Framer Motion · JavaScript · CSS3

EDUCATION

Bachelor of Science — Computer Science & Engineering (BSc CSE)

North South University — Dhaka, Bangladesh | 4th Year | 2021 – Present

Bangladesh's First & Leading Private University

EXTRA-CURRICULAR ACTIVITIES

- Active volunteer and team contributor in collaborative university and community projects
- Participated in group coding and problem-solving initiatives as part of peer learning programs

LANGUAGES

Bengali — Native Proficiency | English — Professional Proficiency (IELTS 7.5 Overall)
